

home performance

**cosmeceutical solution
by mesoestetic®**

mesoestetic®

pre-treatment

continuous maintenance

post-treatment

mesoestetic[®], one of the most advanced laboratories in Europe, is an established reference in the medical cosmetics sector thanks to its continuous research efforts and the efficacy of its products, which are scientifically proven and supported by technical studies.

In order to maximise the results obtained at the clinic, **mesoestetic**[®] has designed **home performance**, a cosmeceutical line for home maintenance with high concentrations of active ingredients, produced according to rigorous safety and pharmaceutical control protocols.

With **home performance**, the professional can recommend the most effective and safest home maintenance products to complement the professional treatment applied in the office.

hydra milk cleanser

200 ml

DESCRIPTION

Cleansing milk for dry and sensitive skin. It effectively removes make-up and impurities, provides intense hydration and respects the skin's physiological balance. Its soothing properties provide a pleasant feeling of comfort.

INDICATIONS

A fundamental stage of daily hygiene for dry and sensitive skins. It prepares the skin effectively before applying a treatment and improves the penetration of any active ingredients applied afterwards.

ACTIVE INGREDIENT

Camomile essential oil: soothing and decongestant.

METHOD OF USE

Apply in the morning and at night with fingertips over the neckline, neck and face with a circular motion. Remove the product with sponges or wet cotton discs and apply **hydratonic**.

facial gel cleanser

200 ml

DESCRIPTION

Facial cleansing gel for normal and combination skin. Removes make-up and cleanses the skin effectively, leaving it smooth and shine-free. Its skin-compatible pH provides high skin tolerance and the ability not to modify the hydro-lipid layer.

INDICATIONS

A fundamental stage of daily hygiene for normal and combination skins, which allows enhancing the response in any treatment applied afterwards.

ACTIVE INGREDIENT

Lactic acid: alpha hydroxy acid with properties stimulating cell renewal and moisturising properties.

METHOD OF USE

Apply in the morning and at night with fingertips over the neckline, neck and face. Emulsify with water until foaming and apply a circular motion. Remove the product with sponges or wet cotton discs and apply **hydratonic**.

purifying cleanser

200 ml

DESCRIPTION

Face cleansing gel for oily and acne prone skin, free from soap or comedogenic oils. It removes impurities and excess skin oil through its mild tensoactive effect. Its oil-regulating, astringent and moisturising active ingredients provide smoothness and brightness.

INDICATIONS

A fundamental stage of daily hygiene for dry and acne prone skins. Particularly indicated as home maintenance in the treatment of acne with **cosmelan active system**, **mandelic_peel AM**, **salicylic_peel AS**, **mesopeel_azelan**, **smartPL acne**.

ACTIVE INGREDIENTS

Salicylic acid: keratolytic and bactericidal.

Liquorice extract: oil regulator.

Aloe vera: depurating and regulator of skin pH.

Hamamelis extract: topical anti-inflammatory, vasoconstrictor and astringent.

METHOD OF USE

Apply in the morning and at night with fingertips over the neckline, neck and face. Emulsify with water until foaming and apply a circular motion. Remove the product with sponges or wet cotton discs and apply **hydratonic**.

hydratonic

200 ml

DESCRIPTION

Facial tonic lotion with an astringent effect for all types of skin. It removes residual impurities and decongests the skin, leaving it fresh, soft and smooth. The absence of alcohol in its composition respects skin pH and prevents dehydration.

INDICATIONS

A stage that complements daily hygiene and the removal of make-up from the skin. Used before the application of any home treatment, it enhances the subsequent skin absorption of active ingredients.

ACTIVE INGREDIENTS

Cucumber extract: decongestant, astringent and antioxidant.

Rose water: moisturising and astringent.

METHOD OF USE

After the cleansing stage, wet a cotton disc and apply over the neckline, neck and face with a dragging motion. Then, perform ascending smoothing motions with the hands until complete product penetration.

anti-stress face mask

100 ml

DESCRIPTION

Soothing, repairing face mask for all types of skin, even the most sensitive. It beats the effect of oxidising stress thanks to its emulsifying, reepithelisation action. Its complex formulation gives it decongestant, anti-inflammatory, antierythematous, antiedematous and antioxidant properties.

INDICATIONS

Some treatments consist of causing controlled aggression on the skin in order to stimulate regeneration. After treatment with **mesoéclat**, **cosmelan**, **mesopeel**, **dermamelan** or **smartPL**, the skin is temporarily congested or sensitised. **anti-stress face mask** is indicated for soothing and restoring the hydro-lipid layer in the areas exposed to these treatments or to environmental aggressions (sun, wind, temperature changes, etc.).

ACTIVE INGREDIENTS

Aloe vera: anti-inflammatory, antiedematous and antierythematous.

Pot marigold extract: soothing and anti-aggression. Reinforces skin defensiveness.

Camomile extract: re-epithelising, antiseptic, and decongestant.

METHOD OF USE

Apply a thick layer over fully clean skin and let it act for 10 minutes. Remove with water. After performing an exfoliating or depigmenting treatment, apply daily at night during the days of irritation and desquamation (only twice a week in oily and acne prone skins). It can also be used up to three times a week as continuous treatment for sensitive skin.

hydra-vital face mask

100 ml

DESCRIPTION

Hydro-nourishing revitalising face mask for dry, dehydrated skin. It provides an intensive moisturising, nourishing and revitalising action and prevents early skin aging thanks to its antioxidant properties.

INDICATIONS

hydra-vital face mask is indicated to remoisturise the skin after performing a treatment that involves temporary dehydration (**mesoéclat**, **mesopeel**) or for intensive repair of dry skin. Ideal also as co-adjutant of the moisturising treatment **photogen system programme 1: hydrophotonic solution**.

ACTIVE INGREDIENTS

Hyaluronic acid: highly moisturising and restructuring.

DNA: emulsifying and intensive regenerator.

Panthenol: prevents transdermal water evaporation and improves cell regeneration.

Vitamins C and E: improve skin elasticity.

METHOD OF USE

Apply a thick layer at night over fully clean skin and let it act for 10 minutes. Remove with plenty of water. As a post-treatment intensive moisturising step, apply every time you notice tight skin. As maintenance for dry skin, it is advisable to apply it twice a week; three times a week in very dry climates.

purifying face mask

100 ml

DESCRIPTION

Purifying, descaling face mask for combination, oily, and acne prone skin. It cleanses the skin in depth thanks to its exfoliating properties, removing dead cells and toxins. It stimulates cell renewal and leaves a feeling of skin smoothness and freshness.

INDICATIONS

Apply twice a week to prepare the skin before the application of any cosmetic treatment requiring optimum penetration of active ingredients. **purifying face mask** is particularly indicated as home maintenance of acne treatments **cosmelan active system**, **mandelic_peel AM**, **salicylic_peel AS**, **mesopeel_azelan**, **dermazelan**, **smartPL acne**.

ACTIVE INGREDIENTS

Tea tree oil: bactericidal, fungicidal and healing.

Burdock extract: detoxifying, antibacterial and antiseptic.

Hamamelis extract: anti-inflammatory.

Hectorite: purifying and astringent.

METHOD OF USE

Apply a thick layer over clean skin and let it act for 5 minutes. Then, perform a gentle friction motion so that the polyethylene microparticles carry away the dead cells built up in the horny layer. Remove with plenty of water.

glycorepair

50 ml

DESCRIPTION

Regenerating gel for all types of skin (except for sensitive skin). It stimulates cell renewal, removing superficial corneocytes. It performs an oil-regulating action and acts as prophylaxis against the appearance of blackheads, while promoting revitalisation of suffocated skin. Its continuous use contributes to even out skin texture, fighting hyperkeratosis and dilated pores.

INDICATIONS

Its application for 15 days prior to performing treatment with **mesopeel** prepares the skin for the pH change caused by the application of acid, homogenising its action and preventing possible adverse reactions. After the desquamation stage subsequent to the treatment, its use optimises the result of succeeding sessions. Ideal also as coadjuvant of the treatment of acne prone, oily, hyperkeratotic and very dry skin.

ACTIVE INGREDIENTS

Glycolic acid: alpha hydroxy acid stimulating cell renewal.
Plant extract complex: increases moisturising level and controls oil secretion.

METHOD OF USE

Apply at night after cleansing and toning the neckline, neck and face with a gentle massage until complete absorption. In cases in which morning application is prescribed, it is essential to complete the treatment by using **moisturising sun protection** or **dermatological sun protection**.

post_procedure fast skin repair

50 ml

DESCRIPTION

A cream with a complex formulation with antiedematous and antierythematous properties enhancing the reepithelisation and healing of tissues damaged by sun exposure or the application of treatments that activate a desquamation process.

INDICATIONS

It is essential to use it in cases of desquamation after applying specific treatments with **mesoéclat**, **cosmelan**, **mesopeel**, **dermamelan** and other treatments including a controlled aggression on the skin during the tissue repair stage.

ACTIVE INGREDIENTS

DMAE: improves skin firmness and elasticity.
Anti-aging complex: starflower oil, centella asiatica extract, liquorice extract.
Antioxidant complex: lipoic acid, coenzyme Q10, idebenon, rosemary plant extract, soy and wheat germ proteins.

METHOD OF USE

Apply over the treated area with a gentle massage until complete absorption each time you experience tight skin. Complete the treatment with the application of **moisturising sun protection** or **dermatological sun protection**.

couperend maintenance cream

50 ml

DESCRIPTION

Cream for sensitive skin susceptible of suffering diffuse redness and/or blood microcapillaries visible on the surface. Its soothing, antierythematous and decongestant action helps minimise skin irritation by acting on the impaired perivascular structure.

INDICATIONS

A desensitising stage for the treatment of hyperreactive skins. In skins that combine sensitivity together with another aesthetic disorder such as dryness and hyper seborrhea, it may be applied before any other **mesoestetic** treatment cream. Particularly indicated as home maintenance of **tmt system programme 8: couperend**.

ACTIVE INGREDIENTS

Centella asiatica: regenerating, moisturising and protector.
Melilot extract: vasoprotector and anti-inflammatory.
Troxeutin: enhances venous tone and reduces vascular hyperpermeability.
Bilberry extract: protector of capillary permeability.
Hesperidin: venoprotector.

METHOD OF USE

Apply twice a day in the morning and at night after cleansing and toning the neckline, neck and face with a gentle massage until complete absorption. In the morning, complete with the application of **dermatological sun protection**.

hydra-vital factor k

50 ml

DESCRIPTION

Ultra moisturising cream particularly indicated to return smoothness and elasticity to dry skin. Its exclusive formulation manages to maintain the hydration of the horny layer and to restore the hydro-lipid layer. It ensures the protection of the skin against external aggressions, neutralising the free radicals responsible for premature aging.

INDICATIONS

It must be used after **mesoéclat**, **cosmelan**, **mesopeel**, **dermamelan** treatments or any other treatment involving temporary skin dehydration. Ideal as a daily care product for dry skin or as a moisturising complement for a specific treatment.

ACTIVE INGREDIENTS

Hydroviton: natural ultra-moisturising complex based on a mixture of amino acids, urea, allantoin, sodium lactate and mineral bio-salts.
Amniotic fluid: biological moisturiser that easily diffuses through the skin.
Silicone oil: it creates a protective film that prevents transdermal evaporation.

METHOD OF USE

Apply in the morning and at night after cleansing and toning the neckline, neck and face with a gentle massage until complete absorption. In the morning, complete with the application of **moisturising sun protection**. As a post-treatment intensive moisturising step, apply up to three times a day. As maintenance for dry skin, it is advisable to apply it twice a day; three times a day in very dry climates.

regenerance active

50 ml

DESCRIPTION

Non-oily moisturising gel for combination skin. Thanks to its high regenerating power, it can restructure the superficial skin layers providing them with elasticity, smoothness and softness. The combination of its active ingredients prevents the formation of wrinkles and provides an immediate tightening effect.

INDICATIONS

A moisturising stage for the treatment of combination, oily and seborrhoeic skin. In skins that due to their secretory characteristics require lipid-free moisturising products, **regenerance active** can replace **hydra-vital factor k** after applying a treatment involving temporary dehydration.

ACTIVE INGREDIENTS

Collagen: powerful moisturiser, firming and anti-wrinkles.
Plant placenta: stimulant of cell regeneration.
Elastin: tensor and restructuring.
Lecithin: moisturiser, emulsifier and protector.

METHOD OF USE

Apply twice a day in the morning and at night after cleansing and toning the neckline, neck and face with a gentle massage until complete absorption. In the morning, complete the treatment with the application of **moisturising sun protection** or **dermatological sun protection**.

cosmelan active system maintenance cream

50 ml

DESCRIPTION

Oil-regulating cream for oily and acne prone skins, free from comedogenic ingredients. It stimulates exfoliation and descales pores, removing blackheads, oily material and cell debris.

INDICATIONS

Maintenance product for treatments regulating seborrhoeic oily skins and correcting skin imperfections: **cosmelan active system**, **mandelic_peel AM**, **salicylic_peel AS**, **mesopeel_azelelan**, **smartPL acne**.

ACTIVE INGREDIENTS

Azelaic acid: bactericidal.
Salicylic acid: bacteriostatic and fungicidal.
Triclosan: antiseptic.
Liquorice extract: oil regulator.
Zinc: healing.

METHOD OF USE

Apply twice a day in the morning and at night after cleansing and toning the neckline, neck and face with a gentle massage until complete absorption. In order to increase the cell renewal levels in the skin, apply only in the morning (followed by **dermatological sun protection**) and combine with the application of **glycorepair** at night.

melanogel anti-spot cream

30 ml

DESCRIPTION

Depigmenting cream for all types of skin (except for sensitive skin). Its specific formula acts by inhibiting the enzyme mechanisms that produce melanin. Its continuous application allows attenuating or eradicating hyperpigmentations of melanin origin and other skin hyperchromias.

INDICATIONS

Product coadjuvant in the treatment of hyperpigmentation with **mandelic_peel AM**, **melanostop_peel**, **tmt system programme 7: melanogel complex system** and **smartPL photorejuvenation**. In skins that combine hyperpigmentation together with another aesthetic disorder such as dryness and hyper seborrhea, it may be applied before any other **mesoestetic** treatment cream.

ACTIVE INGREDIENTS

Tyrosinase inhibitor complex.
Other depigmenting active ingredients: kojic acid, phytic acid, liquorice extract, alpha-arbutin.

METHOD OF USE

Apply twice a day in the morning and at night after cleansing and toning the neckline, neck and face with a gentle massage until complete absorption. In the morning the treatment must be completed with the application of **moisturising sun protection** or **dermatological sun protection**.

melanogel touch

15 ml

DESCRIPTION

Specific depigmenting treatment for melanin spots. It acts by inhibiting the enzyme mechanisms that produce melanin. Its presentation allows for repeated application throughout the day, maximising the effect inhibiting skin hyperchromias.

INDICATIONS

A coadjuvant in the treatment of hyperpigmentation with **cosmelan**, **mandelic_peel AM**, **melanostop_peel**, **dermamelan**, **tmt system programme 7: melanogel complex system** and **smartPL photorejuvenation**.

ACTIVE INGREDIENTS

Tyrosinase inhibitor complex.
Other depigmenting active ingredients: kojic acid, phytic acid, azelaic acid, salicylic acid.

METHOD OF USE

Apply 3 or 4 times a day directly over the pigmented lesion. The treatment must be completed with the application of **moisturising sun protection** or **dermatological sun protection**.

proteoglycans ampoules

10 x 2 ml

DESCRIPTION

Nourishing ampoules for dry skin. They fight the signs of photoaging, preventing the occurrence of expression lines. Its long-term use stimulates the metabolism of the connective tissue, improving its biochemical parameters and recovering its elasticity and smoothness.

INDICATIONS

proteoglycans ampoules is indicated to remoisturise the skin after performing a treatment that involves temporary dehydration (**mesoéclat**, **mesopeel**) or for intensive repair of dry skin. Ideal also as coadjuvant for a facial mesotherapy treatment with **mesohyal** or the moisturising treatment **photogen system programme 1: hydrophotonic solution**.

ACTIVE INGREDIENTS

Proteoglycans: with moisturising, nourishing and tensor properties.
Vitamin C: antioxidant, brightener and promoting collagen synthesis.
Vitamin F: anti-redness and regulating fat metabolism.

METHOD OF USE

After cleansing and toning the neckline, neck and face, apply by ascending smoothing motions until complete absorption. As a post-treatment intensive moisturising step, apply 3 times a week. As maintenance for dry skin, it is advisable to apply it once a week.

anti-aging flash ampoules

3 x 2 ml
10 x 2 ml

DESCRIPTION

Anti-aging ampoules with immediate tensor effect. The combination of its active ingredients removes the signs of fatigue, provides immediate hydration and brightness, smoothing fine lines and expression lines. Thanks to its repairing and firming properties, it fights flaccidity and contributes to redefining the face.

INDICATIONS

anti-aging flash ampoules is indicated to maintain the tensor effect of the anti-aging treatments **mesoéclat**, **tmt system programme 5: anti-aging, photogen system programme 2: tightening skin solution** and **smartPL photorejuvenation**. It is also used as a base for make-up in order to prolong fixation and obtain a flash effect.

ACTIVE INGREDIENTS

Plant tensor: with elastic properties and immediate anti-wrinkle effect.
Collagen: powerful moisturiser, firming and anti-wrinkles.
Elastin: tensor and restructuring.
Vitamin C: antioxidant, brightener and promoting collagen synthesis.
Mimosa tenuiflora: microcirculation stimulant.

METHOD OF USE

After cleansing and toning the neckline, neck and face, apply by ascending smoothing motions until complete absorption.

moisturising sun protection | SPF50+

50 ml

DESCRIPTION

Very high sun protection for normal and dry skin. It includes several types of sun filters that provide a barrier effect against UV rays. Due to its moisturising and antioxidant properties, it is the essential complement of any type of treatment involving temporary skin dehydration.

INDICATIONS

Fundamental base for the photoprotection of normal and dry skin. Exposure to UV radiation as the main factor responsible for skin aging and the occurrence of post-inflammatory hyperpigmentation, **mesoestetic** recommends its daily application, regardless of the treatment applied.

ACTIVE INGREDIENTS

Tioveil AQN: powerful hypoallergenic physical filter.
Parsol MCX: chemical filter with no systemic absorption and with moisturising properties.
Hydroviton: natural ultra-moisturising complex.
Vitamin E: antioxidant.

METHOD OF USE

Apply after the treatment product and/or before sun exposure. Repeat as necessary, based on photoexposure. Avoid prolonged sun exposure even when using a sun protection.

dermatological sun protection | SPF50+

50 ml

DESCRIPTION

Very high sun protection for sensitive, combination and oily skin, with a broad spectrum against UVA and UVB radiation. Essential complement of any treatment involving temporary dehydration of the skins that require lipid-free moisturising products, due to their secretory characteristics or hypersensitivity.

INDICATIONS

Fundamental photoprotection stage for sensitive, combination and oily skin. Exposure to UV radiation as the main factor responsible for skin aging and the occurrence of post-inflammatory hyperpigmentation, **mesoestetic** recommends its daily application, regardless of the treatment applied.

ACTIVE INGREDIENT

Tioveil AQN: powerful hypoallergenic physical filter.

METHOD OF USE

Apply after the treatment product and/or before sun exposure. Repeat as necessary, based on photoexposure. Avoid prolonged sun exposure even when using a sun protection.

tricology hair growth intensive lotion

15 x 3 ml

DESCRIPTION

Intensive anti-hair loss treatment lotion with scalp revitalising action. It separately fights the multiple factors responsible for male and female androgenic alopecia: it enhances blood flow, promoting the arrival of nutrients, stimulates hair follicles and moisturises the hair.

INDICATIONS

Coadjuvant of treatments for androgenic alopecia with **tmt system programme 9: tricology** and mesotherapy treatment with **mesohyal BIOTIN**. Ideal also as maintenance treatment during temporary hair loss periods.

ACTIVE INGREDIENTS

Trisaccharides: stimulant of hair follicle structure.
Follicusan: increases the number of hair follicles.
Cegaba: stimulant of follicular cells.
Biomin: enhances the physiological function of the hair.
Vitamin B6: antiseborrhoeic.

METHOD OF USE

Apply the content of a single dose over the scalp, at the hairline, gently massaging the scalp with a circular motion until complete absorption of the solution. Apply at night every other day. Wash with **tricology intensive hair loss shampoo** the morning after.

tricology intensive hair loss shampoo

200 ml

DESCRIPTION

Anti-hair loss shampoo with dermocompatible pH, smooth and non-irritating. Its scalp revitalising action fights male and female androgenic alopecia, slowing down and attenuating its progression. Its complex formulation enhances blood flow, promoting the arrival of nutrients, stimulates hair follicles and moisturises the hair.

INDICATIONS

Coadjuvant of treatments for androgenic alopecia with **tmt system programme 9: tricology** and mesotherapy treatment with **mesohyal BIOTIN**. Ideal also as maintenance treatment during temporary hair loss periods.

ACTIVE INGREDIENTS

Serena repens extract: stimulates hair growth.
Vitamin PP: enhances hair vasodilation.
Vitamin B6: antiseborrhoeic.
Zinc: oil regulator.

METHOD OF USE

Apply every other day with **tricology hair growth intensive lotion** performing a gentle circular motion and allow it to act for a few minutes. Rinse the hair with plenty of water. In dry hair, apply only twice a week.
